October 31, 2017

#### **Marine Safety Center Website Enhancements**

As previously announced, the Marine Safety Center's official website continues to be transitioned to an enhanced platform with a new web address which can be accessed at: [www.dco.uscg.mil/msc](http://www.dco.uscg.mil/msc).

During the recent Coast Guard wide migration of all of its public facing websites, the functionality of the Marine Safety Center's previously maintained websites, <https://homeport.uscg.mil/msc> and [www.uscg.mil/hq/msc](http://www.uscg.mil/hq/msc), has been impacted. The Marine Safety Center no longer intends to maintain these websites.

All Marine Safety Center plan review guides, tonnage guides, and ballast water type approvals are now available on our improved website. We will continue to add additional references and functionality in the coming weeks. In the interim, you may experience "under construction" page notifications while navigating through our site pages.

If you require assistance locating an electronic document on our website or wish to provide feedback concerning the transition, you may contact Mr. Marcus Akins of the MSC's Tonnage Division Staff at (202) 795-6787 or [marcus.j.akers@uscg.mil](mailto:marcus.j.akers@uscg.mil).

We thank you in advance for your patience as we continue to build an enhanced website experience.

J. W. MAUGER  
Captain, U. S. Coast Guard  
Commanding Officer
